It is the belief of court attaches that the supreme court will be unable to reach Dr. Hyde's case for at least a year, on account of the crowded condition of the docket. In the meantime, the prisoner may be kept in the county jail or sent to the state's prison at Jefferson City by Judge Latshaw.

"The very enormity of the crime made the conviction difficult. It is hard for the human mind to conceive a depravity so great as to cause any man to attempt the utter destruction of his friend and benefactor and six other close relatives. Because of this it was necessary for the state to first convince a skeptical but honest coroner's jury, to next convince a skeptical but honest to a skeptical but honest trial jury evidences which not only proved, but overwhelmingly demonstrated the defendant's guilt and absolutely showed the utter impossibility of his imnocence.

"The loss of the grand jury notes and their subsequent discovery in the hands of the defense, coupled with the defiant refusal of the defense to restore those notes to the court, only resulted in demonstrating the desperate position of the defense and what an awful guilt lay behind such desperate and defiant action.

Bombs of Pieric Acid, the Most Deadly Thing Known, Could Easily be Dropped on Them.

New York, May 16.-Glenn H. Curtiss, the aviator, believes that the day of Dreadnoughts and monster battleships is past, and that by the time the next great war breaks out, the huge baxtleship Florida and the other costly floating forts of this and other navies

will be useless. Swarms of light, swift aeroplanes, he says, will replace the tardier, more sluggish ships of the sea, and wil warm like deadly insects over the oldashloned navies, "dropping their ter-ible poison in the shape of pieric acid combs before the unwieldy men of war are able to retainte."

More than 1,000 aeroplanes can be cunched for the price of a single bat-leshin, he says.

More than 1,000 aeropianes can celeanched for the price of a single battleship, he says.

"I was much interested in the launching of the Florida the other day," said Mr. Curtiss. "I heartily subscribe to the preparations we are making to defend our country from all aggression. But I do not believe that we are going about it in the right way in view of modern conditions.

"Battleships have been impressive engines of war, but their day is practically done. It is as sure as death and taxes that the airship will supersede the great floating structure of steel with its immense guns.

"Imagine, for instance, that a hostile fleet be anchored 20 miles off New York. Suppose it consists of some of the most powerful of modern vesseis like the Florida, Before it could begin to shell the city, our fleet of aeroplanes would start from New Jersey flats. Suppose we have only 200 of them.

"Bombs were used in the South African war which weighed not more than 10 pounds. They were made of picric acid. So far as I know, there is nothing more deadly.

"During the day the aeroplanes could soar away at a great height. They could be painted the color of the aky. Before the lookouts on the hostile fivet could discern the fliers the aeroplanes could swoop down and blow the warships to pieces. Before the ships could bring any of their clumsy guns into action, the aeroplanes would be off.
"Before another year has passed, many nations will devote the millions they are now spending on Dreadnoughts in building fleets of aeroplanes. It is inevitable."

Gravity as Light as a Bag Of Feathers.

James E. Talmage, geologist and engineer, Judge W. H. Dickson, counsel for the Kearns crowd, experimented with figures in elementary physics at the hearing of the Silver King Consolidated Mining company against the Silver King Coalition Mines company this morning. By a method all his own P. Brooks, engineer for the Kearns ompany, and Dr. Talmage, so as 1. how an apparent discrepancy in the esult of the specific gravity of the re which has been calculated. During the examination, Judge Dickson said that the Ellver King Mines company efused to pay "dead weight" for the vater in the ore and proceeded to de-

water in the ore and proceeded to deduct it.

By taking the weight of the ore as calculated by Brooks and using the specific gravity obtained by Dr. Talmage, Judge Dickson obtained some amusing results. In some cases he showed where the specific gravity of the ore was as light as that of a bag of feathers. Taking sample B9 which is described as a lead, silver and iron ore, he took the amount of moisture as previously determined as 24.2. In 100 gramms of ore this would leave 75.8 dry ore. Then by taking the specific gravity as 4.61 as determined by Dr. Talmage and dividing it into the amount of ore, he obtained a result of 25.18 which represents the volume of water the ore would displace if it did not absorb any water. By dividing the amount of the dry ore into the volume, he obtained the specific gravity at 1.53 which would be lower than common soil. Then taking this he figured that it would take 20.93 cubic feet of ore to make a ton. At this rate, the ore in the Parson stope was low grade and it only contained about 30 tons of ore.

Judge Dickson prepared his cross ex-

The anticipated return of the license committee's report again recommending that Emil Lehman be granted a liquor license for the Sah Palace and excluding Heath brothers, will bring strong opposition from various sources. The council is divided on the matter of granting this license, some councilmen contending that if Lehman is given the pricilege of selling liquor at the resort, the Heaths should also begiven the Dickness they seek. Other members are opposed to the granting of a license to anyone at the Sah Palace and this attitude is supported by the women's clubs and the juvenile court officers. Following the reception by the monarch he was assected to Buckingham paints and shown into the throne room where, on the catafalque, reposes the body of King Edward. Mr. Rosevelt was accompanied to the palace by Mrs. Rosevelt and the members of the American embassy and their wives. The Victorian station is closely picketed and patrolled by the police. Every cutrance and exit is guarded and all applicants for admission are scrutinized. This precaution is taken for the protection of all the members of royalty and other official representatives who are coming here for the funeral. In the course of the forenoon Mr. Roosevelt called on the Duke and Duchess of Comanght at Clarence house.

Arrangements have been made for Mr. Roosevelt to deliver his Romanes lecture in the Sieddonian theater, Oxford, on June 7. A convocation will precede the lecture, Lord Curzon presiding, at which the honorary degree of D.C.L. will be conferred on Mr. Roosevelt.
